DETAILED ACTION

This Office action is in response to the amendment filed March 3, 2005 in which claims 63, 73, 80 and 90 were amended and claims 39-56 were canceled. The allowability of claims 57-64, 66-74 and 76-91 is withdrawn.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 63, 73, 80, 90, 96, 97 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected because it is not clear how "coal" may be a solvent. Also, the term "coal" appears twice in the claims.

3. Claims 64, 81, 91 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected because the language "selected from the group selected from" is improper Markush language.

4. Claims 66, 76, 84 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected because it is not clear if the base fuel is coal. In claim 84, "feed" should read – fuel --.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 57-59 and 62 are rejected under 35 U.S.C. 102(b) as being anticipated by Finnann (US 4,504,499).

Finnan teaches a heat-stabilized carotenoid-colored edible oil comprising stabilizing amounts of at least one of the following antioxidants (thermal stabilizers): lauryl thiodipropionate, dilauryl thiopropionate, a tocopherol and mixtures thereof (see abstract). The edible oil may be wheat-germ oil (see col. 2, lines 55-65) and the carotenoid may be beta-carotene or lycopene (see col. 1, lines 48-60; Example 1). The carotene is suspended in an edible oil such as peanut oil (diluent or thermal stabilizer)(see col. 3, lines 62-65). Finnann is not directed to a fuel additive; however, intended use is given no patentable weight in claims that are directed to the composition per se.

Accordingly, Finnann teaching all the limitations of the claims anticipates the claims.

7. Claims 57-59, 62 and 64 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujiwara (US 5,705,526).

Fujiwara teaches a composition comprising lycopene, beta-carotene, alpha-carotene, d,l-tocopherol and a mixture of wheat-germ oil and a vegetable oil (see abstract). Fujiwara also teaches that the composition may comprise a solvent and a dispersant (see col. 3, lines 51—56). The carotene of the example is dispersed in palm oil (diluent or thermal stabilizer)(see col. 5, line 2). Fujiwara is not directed to a fuel oil additive. However, intended use is given no patentable weight in claims that are directed to the composition per se.

Accordingly, Fujiwara teaching all the limitations of the claims anticipates the claims.

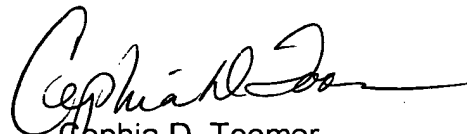

8. Claims 60-61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to teach or suggest that the plant oil extract is derived from barley and carotenoid, the combination of the barley oil extract and beta-carotene; and that the thermal stabilizer is meadowfoam oil.

9. Claims 93-95 are allowable because the prior art fails to teach the coal additive comprising the combination of the barley oil extract and beta-carotene; and that the thermal stabilizer is meadowfoam oil.
